

EXPERIMENT 3 – DATA VISUALIZATION

3(a) Data Visualization Using Line Plot

Aim: To show data visualization using a line plot.

```
import matplotlib.pyplot as cricket

Overs = list(range(5, 51, 5))
Indian_Score = [30,55,90,129,165,200,239,270,310,350]
Srilankan_Score = [25,70,90,120,140,170,195,220,255,279]

cricket.plot(Overs, Indian_Score, color="green", label="INDIA")
cricket.plot(Overs, Srilankan_Score, color="red", label="SRILANKA")
cricket.title("INDIA Vs SRILANKA")
cricket.xlabel("Overs")
cricket.ylabel("Score")
cricket.legend(loc="center right")
cricket.show()
```

3(b) Data Visualization Using Bar Chart

```
import matplotlib.pyplot as hscmark
import numpy as np

Names = ['SHREE', 'DEV', 'KEERTHI', 'PRIYA', 'SHAN', 'KUMARAN']
xaxis = np.arange(len(Names))
Percentage_hsc = [96,91,94,75,45,81]

hscmark.bar(Names, Percentage_hsc)
hscmark.xticks(xaxis, Names, rotation=45)
hscmark.xlabel("Names of Pupil")
```

```
hscmark.ylabel("Percentage")
hscmark.title("Comparison of HSC Percentage", fontsize=20, color="green")
hscmark.show()
```

3(c) Data Visualization Using Pie Chart

```
import matplotlib.pyplot as election

labels = ['CANDIDATE 1','CANDIDATE 2','CANDIDATE 3','CANDIDATE 4']
Votes = [315,130,245,210]
colors = ['green','yellow','red','orange']
explode = (0.2,0,0,0)

election.pie(Votes, labels=labels, colors=colors, explode=explode, autopct='%0.2f%%')
election.title('Election Results')
election.show()
```

Result

The given data was successfully visualized using line plot, bar chart and pie chart.
